

Welcome

For over 30 years, The Low Vision Institute has offered unique, comprehensive, low vision care to patients challenged by conditions such as: macular degeneration, diabetic retinopathy, glaucoma, albinism, brain injury, stroke, and retinitis pigmentosa.

We are located in Fort Lauderdale, Florida with satellite offices in Stuart, Miami, Boca Raton, West Palm Beach, and the Villages just north of Orlando. Our patients come from as close as the next block to all corners of the world.

We utilize the powerful three step RenewView® Low Vision Program which integrates our exclusive comprehensive examination, innovative devices and unique low vision rehabilitative therapy. With over 90% success rate, we've helped thousands of patients regain vision, independence and a quality of life they could only imagine. Our patients participate in activities they had lost the ability to enjoy. They can read, write, paint, play cards, see a menu, fill out checks, and enjoy live theater, to name a few.

If you or someone you know could benefit from our program, please contact us and schedule an evaluation today.

From your first phone call, we will treat you with respect, compassion and care.
